EPSA Epistemology and Methodology of Science: Launch of the European Philosophy of Science Association

These two volumes contain a selection of the papers delivered at the first conference of the European Philosophy of Science Association (EPSA) which took place in Madrid, at Complutense University, from 14 to 17 November 2007. The first volume is entitled Epistemology and Methodology, and includes papers mainly concerned with general philosophy of science, rationality, and method. The second volume, devoted to Philosophical Issues in the Sciences, includes papers concerned with philosophy of the sciences, particularly physics, economics, chemistry and biology. Overall the selection has been very severe and took place in two stages. The 30-strong conference programme committee chaired by Mauro Dorato and Miklos Rédei first selected 160 papers for presentation out of 410 abstracts submitted. After the conference the three of us went on to further select 60 papers among those delivered. The selection was made on the recommendation of the members of the programme committee and the chairs of the conference sessions, who were invited to nominate their favourite papers and provide reasons for their choices. Every paper included in these volumes has been independently nominated by at least two referees. There are thus good grounds to claim that these essays constitute some of the most significant and important research presently carried out in the philosophy of science throughout Europe. The two volumes also represent the first tangible outcome of the newly born EPSA. Together with the conference they in effect constitute the launching of the Association.
