Spark: Big Data Cluster Computing in Production Ilya Ganelin, Ema Orhian, Kai Sasaki, Brennon York
Production-targeted Spark guidance with real-world use cases

Spark: Big Data Cluster Computing in Production goes beyond general Spark overviews to provide targeted guidance toward using lightning-fast big-data clustering in production. Written by an expert team well-known in the big data community, this book walks you through the challenges in moving from proof-of-concept or demo Spark applications to live Spark in production. Real use cases provide deep insight into common problems, limitations, challenges, and opportunities, while expert tips and tricks help you get the most out of Spark performance. Coverage includes Spark SQL, Tachyon, Kerberos, ML Lib, YARN, and Mesos, with clear, actionable guidance on resource scheduling, db connectors, streaming, security, and much more.

Spark has become the tool of choice for many Big Data problems, with more active contributors than any other Apache Software project. General introductory books abound, but this book is the first to provide deep insight and real-world advice on using Spark in production. Specific guidance, expert tips, and invaluable foresight make this guide an incredibly useful resource for real production settings.

- Review Spark hardware requirements and estimate cluster size
- Gain insight from real-world production use cases
- Tighten security, schedule resources, and fine-tune performance
- Overcome common problems encountered using Spark in production

Spark works with other big data tools including MapReduce and Hadoop, and uses languages you already know like Java, Scala, Python, and R. Lightning speed makes Spark too good to pass up, but understanding limitations and challenges in advance goes a long way toward easing actual production implementation.

Spark: Big Data Cluster Computing in Production tells you everything you need to know, with real-world production insight and expert guidance, tips, and tricks.

From reader reviews:

Jeff Williams:

Book is actually written, printed, or illustrated for everything. You can understand everything you want by a reserve. Book has a different type. As it is known to us that book is important point to bring us around the world. Beside that you can your reading talent was fluently. A publication Spark: Big Data Cluster Computing in Production will make you to possibly be smarter. You can feel a lot more confidence if you can know about almost everything. But some of you think that open or reading the book make you bored. It isn't make you fun. Why they might be thought like that? Have you looking for best book or ideal book with you?

Patrick Myers:

Do you have something that you enjoy such as book? The book lovers usually prefer to choose book like comic, limited story and the biggest one is novel. Now, why not attempting Spark: Big Data Cluster Computing in Production that give your satisfaction preference will be satisfied by reading this book. Reading routine all over the world can be said as the method for people to know world considerably better then how they react when it comes to the world. It can't be stated constantly that reading routine only for the geeky individual but for all of you who wants to possibly be success person. So , for all you who want to start reading through as your good habit, it is possible to pick Spark: Big Data Cluster Computing in Production become your own personal starter.

John Jeanbaptiste:

It is possible to spend your free time to read this book this publication. This Spark: Big Data Cluster Computing in Production is simple to deliver you can read it in the area, in the beach, train in addition to soon. If you did not get much space to bring often the printed book, you can buy typically the e-book. It is make you quicker to read it. You can save the book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.

Ruby Guillen:

Publication is one of source of information. We can add our know-how from it. Not only for students and also native or citizen have to have book to know the revise information of year to be able to year. As we know those publications have many advantages. Beside we add our knowledge, may also bring us to around the world. From the book Spark: Big Data Cluster Computing in Production we can take more advantage. Don't that you be creative people? For being creative person must choose to read a book. Just choose the best book that suited with your aim. Don't possibly be doubt to change your life with this book Spark: Big Data Cluster Computing in Production. You can more pleasing than now.
