Data Preprocessing in Data Mining (Intelligent Systems Reference Library) Salvador García, Julián Luengo, Francisco Herrera

Data Preprocessing for Data Mining addresses one of the most important issues within the well-known Knowledge Discovery from Data process. Data directly taken from the source will likely have inconsistencies, errors or most importantly, it is not ready to be considered for a data mining process. Furthermore, the increasing amount of data in recent science, industry and business applications, calls to the requirement of more complex tools to analyze it. Thanks to data preprocessing, it is possible to convert the impossible into possible, adapting the data to fulfill the input demands of each data mining algorithm. Data preprocessing includes the data reduction techniques, which aim at reducing the complexity of the data, detecting or removing irrelevant and noisy elements from the data.

This book is intended to review the tasks that fill the gap between the data acquisition from the source and the data mining process. A comprehensive look from a practical point of view, including basic concepts and surveying the techniques proposed in the specialized literature, is given.Each chapter is a stand-alone guide to a particular data preprocessing topic, from basic concepts and detailed descriptions of classical algorithms, to an incursion of an exhaustive catalog of recent developments. The in-depth technical descriptions make this book suitable for technical professionals, researchers, senior undergraduate and graduate students in data science, computer science and engineering.

From reader reviews:

Mindy Martinez:

Reading a guide can be one of a lot of activity that everyone in the world loves. Do you like reading book consequently. There are a lot of reasons why people love it. First reading a publication will give you a lot of new details. When you read a publication you will get new information due to the fact book is one of numerous ways to share the information or their idea. Second, examining a book will make you actually more imaginative. When you reading a book especially hype book the author will bring someone to imagine the story how the personas do it anything. Third, you can share your knowledge to other individuals. When you read this Data Preprocessing in Data Mining (Intelligent Systems Reference Library), you could tells your family, friends and also soon about yours reserve. Your knowledge can inspire the mediocre, make them reading a reserve.

Shannon Palmer:

Data Preprocessing in Data Mining (Intelligent Systems Reference Library) can be one of your basic books that are good idea. We recommend that straight away because this reserve has good vocabulary that may increase your knowledge in words, easy to understand, bit entertaining but still delivering the information. The article author giving his/her effort to get every word into joy arrangement in writing Data Preprocessing in Data Mining (Intelligent Systems Reference Library) but doesn't forget the main stage, giving the reader the hottest and also based confirm resource data that maybe you can be one of it. This great information can certainly drawn you into brand-new stage of crucial thinking.

Scott Schiller:

Your reading 6th sense will not betray anyone, why because this Data Preprocessing in Data Mining (Intelligent Systems Reference Library) publication written by well-known writer whose to say well how to make book that could be understand by anyone who else read the book. Written with good manner for you, leaking every ideas and writing skill only for eliminate your hunger then you still hesitation Data Preprocessing in Data Mining (Intelligent Systems Reference Library) as good book not merely by the cover but also from the content. This is one e-book that can break don't assess book by its protect, so do you still needing a different sixth sense to pick that!? Oh come on your reading through sixth sense already said so why you have to listening to an additional sixth sense.

Allen Lutz:

That book can make you to feel relax. This specific book Data Preprocessing in Data Mining (Intelligent Systems Reference Library) was colorful and of course has pictures around. As we know that book Data Preprocessing in Data Mining (Intelligent Systems Reference Library) has many kinds or genre. Start from kids until adolescents. For example Naruto or Private investigator Conan you can read and think that you are the character on there. Therefore not at all of book are make you bored, any it offers up you feel happy, fun

and relax. Try to choose the best book to suit your needs and try to like reading which.
