Peter Flach

Machine Learning: The Art and Science of Algorithms that Make Sense of Data Peter Flach

As one of the most comprehensive machine learning texts around, this book does justice to the field's incredible richness, but without losing sight of the unifying principles. Peter Flach's clear, example-based approach begins by discussing how a spam filter works, which gives an immediate introduction to machine learning in action, with a minimum of technical fuss. Flach provides case studies of increasing complexity and variety with well-chosen examples and illustrations throughout. He covers a wide range of logical, geometric and statistical models and state-of-the-art topics such as matrix factorisation and ROC analysis. Particular attention is paid to the central role played by features. The use of established terminology is balanced with the introduction of new and useful concepts, and summaries of relevant background material are provided with pointers for revision if necessary. These features ensure Machine Learning will set a new standard as an introductory textbook.

From reader reviews:

Arnold Grigg:

The reason? Because this Machine Learning: The Art and Science of Algorithms that Make Sense of Data is an unordinary book that the inside of the reserve waiting for you to snap it but latter it will surprise you with the secret this inside. Reading this book next to it was fantastic author who also write the book in such amazing way makes the content interior easier to understand, entertaining method but still convey the meaning totally. So , it is good for you for not hesitating having this anymore or you going to regret it. This excellent book will give you a lot of benefits than the other book possess such as help improving your skill and your critical thinking way. So , still want to hold off having that book? If I have been you I will go to the publication store hurriedly.

Gloria Brower:

Playing with family inside a park, coming to see the ocean world or hanging out with pals is thing that usually you will have done when you have spare time, in that case why you don't try thing that really opposite from that. One activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Machine Learning: The Art and Science of Algorithms that Make Sense of Data, you can enjoy both. It is very good combination right, you still desire to miss it? What kind of hang-out type is it? Oh occur its mind hangout folks. What? Still don't understand it, oh come on its referred to as reading friends.

Tony Paulson:

Machine Learning: The Art and Science of Algorithms that Make Sense of Data can be one of your basic books that are good idea. Many of us recommend that straight away because this book has good vocabulary which could increase your knowledge in language, easy to understand, bit entertaining but nonetheless delivering the information. The article writer giving his/her effort to get every word into joy arrangement in writing Machine Learning: The Art and Science of Algorithms that Make Sense of Data yet doesn't forget the main position, giving the reader the hottest as well as based confirm resource data that maybe you can be considered one of it. This great information may drawn you into new stage of crucial considering.

William Stewart:

As we know that book is vital thing to add our know-how for everything. By a publication we can know everything we want. A book is a list of written, printed, illustrated or perhaps blank sheet. Every year seemed to be exactly added. This book Machine Learning: The Art and Science of Algorithms that Make Sense of Data was filled concerning science. Spend your extra time to add your knowledge about your technology competence. Some people has several feel when they reading the book. If you know how big benefit from a book, you can feel enjoy to read a book. In the modern era like right now, many ways to get book that you just wanted.
