## 1000 / Fundamental Organic Chemistry Set with resealable bag (HGS Polyhedron Molecular Model) HGS Maruzen

(1) In the HGS polyhedron models, atoms are represented by polyhedrons, and bonds are represented by sticks. Polyhedron atoms have holes corresponding to the exact bond angles: e.g.,  $sp^3$  carbon with  $109^\circ 28'$ ;  $sp^2$  carbon with  $120^\circ$ ;  $sp$  carbon with  $180^\circ$ . Sticks of different bond lengths are provided. So students can assemble molecular models considering the hybrid orbital of atoms and bond length. The HGS molecular models are thus very useful for students to understand not only molecular structure but also atom hybrid orbitals, bond angle, and bond length. (2) Because of the exact mechanical matching of hole and stick, polyhedron atoms can smoothly rotate around a bond stick connecting atoms, but the rotation needs some small force. Therefore, the HGS models of high quality are the best for demonstrating conformational changes. For example, the cyclohexane ring flips can be easily performed even by beginners, and the ideal chair form and flipped one are readily obtained together with the boat form as an intermediate. Another example is the all-trans conformation of n-hexane, which is easily assembled and maintained. It is thus easy to maintain a specific conformation of flexible acyclic compounds. (3) In some models including the HGS polyhedron models, two  $sp^3$  carbon atoms connected with two bent bonds are traditionally used as a  $C = C$  double bond, because it easily visualizes the double bond (two bonds). However, such simple visualization may be confusing to students, because this structure is scientifically incorrect. In the HGS model, two  $sp^2$  carbon atoms can be connected with one  $\sigma$ -bond, and  $\pi$ -bond can be made by using p-atomic orbital plates, showing the correct structure and bonding mechanism of a  $C = C$  double bond. After understanding the basic nature of double bond, p-atomic orbital plates become unnecessary for assembling larger molecules. If double and triple bonds of old type are desired, it is still possible to use the bent bonds

### **From reader reviews:**

#### **Ramona Wegener:**

Have you spare time for a day? What do you do when you have much more or little spare time? Yep, you can choose the suitable activity with regard to spend your time. Any person spent all their spare time to take a walk, shopping, or went to the Mall. How about open or read a book called 1000 / Fundamental Organic Chemistry Set with resealable bag (HGS Polyhedron Molecular Model)? Maybe it is to get best activity for you. You already know beside you can spend your time with your favorite's book, you can wiser than before. Do you agree with the opinion or you have various other opinion?

#### **Chad Jones:**

Reading a publication can be one of a lot of pastime that everyone in the world really likes. Do you like reading book therefore. There are a lot of reasons why people love it. First reading a reserve will give you a lot of new info. When you read a guide you will get new information simply because book is one of a number of ways to share the information or even their idea. Second, reading through a book will make you more imaginative. When you reading a book especially fictional book the author will bring that you imagine the story how the characters do it anything. Third, you are able to share your knowledge to others. When you read this 1000 / Fundamental Organic Chemistry Set with resealable bag (HGS Polyhedron Molecular Model), you are able to tells your family, friends and soon about yours e-book. Your knowledge can inspire the mediocre, make them reading a reserve.

#### **Colton Fierros:**

You can get this 1000 / Fundamental Organic Chemistry Set with resealable bag (HGS Polyhedron Molecular Model) by check out the bookstore or Mall. Just simply viewing or reviewing it may to be your solve issue if you get difficulties for ones knowledge. Kinds of this book are various. Not only simply by written or printed but in addition can you enjoy this book by simply e-book. In the modern era including now, you just looking of your mobile phone and searching what their problem. Right now, choose your personal ways to get more information about your publication. It is most important to arrange yourself to make your knowledge are still update. Let's try to choose suitable ways for you.

#### **Bruce Harrison:**

A lot of e-book has printed but it is different. You can get it by world wide web on social media. You can choose the very best book for you, science, comic, novel, or whatever by searching from it. It is identified as of book 1000 / Fundamental Organic Chemistry Set with resealable bag (HGS Polyhedron Molecular Model). You can contribute your knowledge by it. Without leaving behind the printed book, it could add your knowledge and make anyone happier to read. It is most essential that, you must aware about guide. It can bring you from one location to other place.
