Stewart's Clinical Removable Partial Prosthodontics (Phoenix, Stewart's Clinical Removable Partial Prosthodontics) Rodney D. Phoenix, David R. Cagna, Charles F. DeFreest

The fourth edition of this classic prosthodontic textbook features a new chapter on implant-assisted removable partial dentures as well as a description of the Prosthodontic Diagnostic Index. As before, the text provides an overview of removable partial denture service in contemporary dental practice with an emphasis on clinical and design aspects. Clinical topics range from examination and treatment planning to mouth preparation and prosthesis placement. Common design philosophies are discussed, and a step-by-step method for partial denture design is presented. Also included are alternative removable partial denture therapies such as Swing Lock, dual path, and attachment-type prostheses. To facilitate visualization and understanding, the text is accompanied by numerous illustrations. Like those that came before it, this edition is intended to help the student, the general practitioner, and the specialist consistently provide high-quality prosthodontic treatment for their patients.

TABLE OF CONTENTS

1. Introduction and Classification
