Computer Aided Engineering Design Anupam Saxena, Birendra Sahay

A new discipline is said to attain maturity when the subject matter takes the shape of a textbook. Several textbooks later, the discipline tends to acquire a firm place in the curriculum for teaching and learning. Computer Aided Engineering Design (CAED), barely three decades old, is interdisciplinary in nature whose boundaries are still expanding. However, it draws its core strength from several acknowledged and diverse areas such as computer graphics, differential geometry, Boolean algebra, computational geometry, topological spaces, numerical analysis, mechanics of solids, engineering design and a few others. CAED also needs to show its strong linkages with Computer Aided Manufacturing (CAM). As is true with any growing discipline, the literature is widespread in research journals, edited books, and conference proceedings. Various textbooks have appeared with different biases, like geometric modeling, computer graphics, and CAD/CAM over the last decade. This book goes into mathematical foundations and the core subjects of CAED without allowing itself to be overshadowed by computer graphics. It is written in a logical and thorough manner for use mainly by senior and graduate level students as well as users and developers of CAD software. The book covers (a) The fundamental concepts of geometric modeling so that a real understanding of designing synthetic surfaces and solid modeling can be achieved. (b) A wide spectrum of CAED topics such as CAD of linkages and machine elements, finite element analysis, optimization. (c) Application of these methods to real world problems.

From reader reviews:

Tim Walton:

Nowadays reading books be a little more than want or need but also get a life style. This reading routine give you lot of advantages. The huge benefits you got of course the knowledge the rest of the information inside the book that will improve your knowledge and information. The info you get based on what kind of e-book you read, if you want get more knowledge just go with education books but if you want sense happy read one with theme for entertaining such as comic or novel. Often the Computer Aided Engineering Design is kind of e-book which is giving the reader erratic experience.

Hye Elliott:

Reading a book being new life style in this yr; every people loves to study a book. When you learn a book you can get a lot of benefit. When you read guides, you can improve your knowledge, because book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your review, you can read education books, but if you want to entertain yourself you are able to a fiction books, this sort of us novel, comics, and soon. The Computer Aided Engineering Design provide you with new experience in reading through a book.

Thomas Burke:

This Computer Aided Engineering Design is brand new way for you who has attention to look for some information since it relief your hunger details. Getting deeper you on it getting knowledge more you know or you who still having small amount of digest in reading this Computer Aided Engineering Design can be the light food in your case because the information inside this book is easy to get by simply anyone. These books develop itself in the form and that is reachable by anyone, yes I mean in the e-book type. People who think that in guide form make them feel tired even dizzy this book is the answer. So there isn't any in reading a book especially this one. You can find actually looking for. It should be here for anyone. So , don't miss this! Just read this e-book variety for your better life and knowledge.

Kimberly Johnson:

What is your hobby? Have you heard that question when you got college students? We believe that that problem was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. And also you know that little person similar to reading or as examining become their hobby. You have to know that reading is very important and book as to be the point. Book is important thing to provide you knowledge, except your current teacher or lecturer. You see good news or update in relation to something by book. Numerous books that can you go onto be your object. One of them is actually Computer Aided Engineering Design.
