Science in the Beginning: Textbook + Hints and Helps (Teacher's Guide) Set by Jay Wile Jay Wile

Dr. Jay Wile, author of the popular Apologia Science books for 7-12 grade, has written a new science textbook especially for elementary grades. Science in the Beginning is the first book in a hands-on, multilevel elementary science series that introduces scientific concepts using history as its guide. The beginning of history is given in the Bible's creation account, and this book uses the days of creation as a way of introducing a wide range of scientific concepts including the nature of light, energy conservation, the properties of air and water, introductory botany, our solar system, basic zoology, and some aspects of human anatomy and physiology. As the students learn about these scientific concepts, they are constantly reminded of the Creator who fashioned the marvels they are studying. Textbook is 299 pages, hardbound textbook for grades K-6. Set consists of the textbook plus the Help and Hints Teacher's Guidebook containing everything the parent/teacher needs to know for the subject, including answers to questions in the textbook, tests, answer keys and more. Hints and Helps Teacher's Guide is 47 pages, softbound.
