Dieses historische Buch kann zahlreiche Tippfehler und fehlende Textpassagen aufweisen. Käufer können in der Regel eine kostenlose eingescannte Kopie des originalen Buches vom Verleger herunterladen (ohne Tippfehler). Ohne Indizes. Nicht dargestellt. 1788 edition. Auszug: ... with it; then a tile is applied to cover the vessel, stopping the joints with thin lute. 21. The crucible is then to be put in the furnace, and a strong fire is to be made that it be kept moderately red hot for, 6 or 10 hours together; at the end of which time they will be found converted into steel. If the cementation be continued too long, the steel will become excessively brittle, incapable of being welded, and apt to crack and sly in forging, The magnetical power is not innate in the iron, but is collected into it by degrees, as is verified by experiments; it may be expelled, it may vanish, and become collected again, as it forging. On the contrary, steel cemented with absorbent earths is reduced to the state of forged iron. 22. Steel is further purified, for making the nicest kinds of instruments, such as lancets, pen-knives, razors, and various piece, for the best kind of wathes, time-hepers, or chronometers, and AUr onomical regulators. This purification of steel, consists in melting it again with a strong, but regular, fire in a crucible, the better to free it from the heterogeneous: parts, and little flaws, that may be contained in it. It is then called cast-steel, when fused into bars: which name, however, does not imply that the pieces, for instance the cast-steel razors, have been really cast in their present shape; for they must be forged from the bar, after it is cast. The fusion must have been perfect, so that the metallic parts be rendered uniform. The metal diminishes a little by this process, for a bar of common steel 36 inches long, will afterwards produce another only of 35; if properly fused and purified. 23. The cast-steel will not bear more than a red heat;...
