**Spark: Big Data Cluster Computing in Production** Ilya Ganelin, Ema Orhian, Kai Sasaki, Brennon York  
**Production-targeted Spark guidance with real-world use cases**

*Spark: Big Data Cluster Computing in Production* goes beyond general Spark overviews to provide targeted guidance toward using lightning-fast big-data clustering in production. Written by an expert team well-known in the big data community, this book walks you through the challenges in moving from proof-of-concept or demo Spark applications to live Spark in production. Real use cases provide deep insight into common problems, limitations, challenges, and opportunities, while expert tips and tricks help you get the most out of Spark performance. Coverage includes Spark SQL, Tachyon, Kerberos, ML Lib, YARN, and Mesos, with clear, actionable guidance on resource scheduling, db connectors, streaming, security, and much more.

Spark has become the tool of choice for many Big Data problems, with more active contributors than any other Apache Software project. General introductory books abound, but this book is the first to provide deep insight and real-world advice on using Spark in production. Specific guidance, expert tips, and invaluable foresight make this guide an incredibly useful resource for real production settings.

- Review Spark hardware requirements and estimate cluster size
- Gain insight from real-world production use cases
- Tighten security, schedule resources, and fine-tune performance
- Overcome common problems encountered using Spark in production

Spark works with other big data tools including MapReduce and Hadoop, and uses languages you already know like Java, Scala, Python, and R. Lightning speed makes Spark too good to pass up, but understanding limitations and challenges in advance goes a long way toward easing actual production implementation.

*Spark: Big Data Cluster Computing in Production* tells you everything you need to know, with real-world production insight and expert guidance, tips, and tricks.

**From reader reviews:**

**Ruth Barnett:**

This book entitled Spark: Big Data Cluster Computing in Production to be one of several books in which best seller in this year, that's because when you read this reserve you can get a lot of benefit on it. You will easily to buy this specific book in the book store or you can order it by using online. The publisher on this book sells the e-book too. It makes you more readily to read this book, as you can read this book in your Smartphone. So there is no reason to you personally to past this guide from your list.

**Spencer Fuentes:**

Do you one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Make an effort to pick one book that you find out the inside because don't ascertain book by its protect may doesn't work this is difficult job because you are scared that the inside maybe not as fantastic as in the outside appearance likes. Maybe you answer might be Spark: Big Data Cluster Computing in Production why because the excellent cover that make you consider regarding the content will not disappoint you. The inside or content is usually fantastic as the outside as well as cover. Your reading 6th sense will directly show you to pick up this book.

**April Brooks:**

That guide can make you to feel relax. This specific book Spark: Big Data Cluster Computing in Production was bright colored and of course has pictures around. As we know that book Spark: Big Data Cluster Computing in Production has many kinds or type. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and believe you are the character on there. Therefore , not at all of book are usually make you bored, any it offers you feel happy, fun and relax. Try to choose the best book for you and try to like reading this.

**Tammie Torres:**

Guide is one of source of understanding. We can add our know-how from it. Not only for students but native or citizen require book to know the change information of year to be able to year. As we know those guides have many advantages. Beside most of us add our knowledge, can also bring us to around the world. By the book Spark: Big Data Cluster Computing in Production we can take more advantage. Don't you to definitely be creative people? Being creative person must choose to read a book. Simply choose the best book that ideal with your aim. Don't end up being doubt to change your life with this book Spark: Big Data Cluster Computing in Production. You can more desirable than now.
