The Biology of the Eye

The Biology of the Eye

Acknowledgement This book is the result of a collective effort. Due to an oversight, mention of three of the contributors who played an especially decisive role in bringing the work to fruition was omitted from the book. They should share fully in the intellectual credits accruing from this publication. I would therefore like to acknowledge and thank the following for their outstanding contributions to editing the work: Dr. Morten Dornonville la Cour (MD, Dr. Med. Sci) solicited and edited the chapters on retina, RPE, choroid, vitreous, immunology, and sclera. Dr. la Cour is a Lecturer, Eye Department, Copenhagen University Hospital, specializes in vitreoretinal surgery, and frequently lectures in the international scene. A trained mathematician, he has done research in retinal pigment epithelial physiology in the laboratories of Drs. Thomas Zeuthen and Sheldon Miller. Dr. Friedrich P.J. Diecke and Dr. Elliott M. Kanner also provided invaluable editorial assistance. Dr Diecke, who was formerly Professor and Chairman of the Department of Physiology, UMDNJ-New Jersey Medical School, is a Professor Emeritus at that institution. His research has concentrated on membrane transport mechanisms in lens epithelial cells, corneal endothelial cells and peripheral nerve and on the regulation of vascular smooth muscle contraction. Dr. Elliott M. Kanner was born in Canada in 1970. He graduated from Yale University in 1992 with a BS/MS degree in Molecular Biophysics and Biochemistry. He received his PhD degree from the Rockefeller University in 1999 and his MD degree from Weill/Cornell in 2001. He is currently an Ophthalmology resident at Columbia University. Jorge Fischbarg, December 2005 This book explores the many recent novel ideas about the eye in a systematic and synthetic way. It includes both basic sciences and applications towards clinical research. Chapters include both anatomical and functional descriptions

From reader reviews:

Amanda Acuna:

This The Biology of the Eye book is not ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book is usually information inside this guide incredible fresh, you will get facts which is getting deeper a person read a lot of information you will get. This The Biology of the Eye without we realize teach the one who reading it become critical in imagining and analyzing. Don't be worry The Biology of the Eye can bring whenever you are and not make your tote space or bookshelves' become full because you can have it in the lovely laptop even telephone. This The Biology of the Eye having very good arrangement in word in addition to layout, so you will not really feel uninterested in reading.

Roger Cooper:

Here thing why this particular The Biology of the Eye are different and dependable to be yours. First of all reading a book is good but it depends in the content of the usb ports which is the content is as delicious as food or not. The Biology of the Eye giving you information deeper and in different ways, you can find any e-book out there but there is no book that similar with The Biology of the Eye. It gives you thrill reading through journey, its open up your current eyes about the thing this happened in the world which is possibly can be happened around you. It is possible to bring everywhere like in park your car, café, or even in your means home by train. When you are having difficulties in bringing the printed book maybe the form of The Biology of the Eye in e-book can be your choice.

Jonathan Rodriguez:

Nowadays reading books are more than want or need but also become a life style. This reading behavior give you lot of advantages. The benefits you got of course the knowledge your information inside the book in which improve your knowledge and information. The data you get based on what kind of reserve you read, if you want have more knowledge just go with education books but if you want really feel happy read one along with theme for entertaining for example comic or novel. The The Biology of the Eye is kind of reserve which is giving the reader unforeseen experience.

Jose Chapman:

As we know that book is important thing to add our knowledge for everything. By a reserve we can know everything we wish. A book is a pair of written, printed, illustrated or even blank sheet. Every year ended up being exactly added. This guide The Biology of the Eye was filled with regards to science. Spend your spare time to add your knowledge about your scientific research competence. Some people has diverse feel when they reading a new book. If you know how big advantage of a book, you can really feel enjoy to read a publication. In the modern era like at this point, many ways to get book that you just wanted.
