## **Laboratory Protocols in Applied Life Sciences** Prakash Singh Bisen

As applied life science progresses, becoming fully integrated into the biological, chemical, and engineering sciences, there is a growing need for expanding life sciences research techniques. Anticipating the demands of various life science disciplines, **Laboratory Protocols in Applied Life Sciences** explores this development.

This book covers a wide spectrum of areas in the interdisciplinary fields of life sciences, pharmacy, medical and paramedical sciences, and biotechnology. It examines the principles, concepts, and every aspect of applicable techniques in these areas. Covering elementary concepts to advanced research techniques, the text analyzes data through experimentation and explains the theory behind each exercise. It presents each experiment with an introduction to the topic, concise objectives, and a list of necessary materials and reagents, and introduces step-by-step, readily feasible laboratory protocols.

Focusing on the chemical characteristics of enzymes, metabolic processes, product and raw materials, and on the basic mechanisms and analytical techniques involved in life science technological transformations, this text provides information on the biological characteristics of living cells of different origin and the development of new life forms by genetic engineering techniques. It also examines product development using biological systems, including pharmaceutical, food, and beverage industries.

Laboratory Protocols in Applied Life Sciences presents a nonmathematical account of the underlying principles of a variety of experimental techniques in disciplines, including:

- Biotechnology
- Analytical biochemistry
- Clinical biochemistry
- Biophysics
- Molecular biology
- Genetic engineering
- Bioprocess technology
- Industrial processes
- Animal
- Plant
- Microbial biology
- Computational biology
- Biosensors

Each chapter is self-contained and written in a style that helps students progress from basic to advanced techniques, and eventually design and execute their own experiments in a given field of biology.

**From reader reviews:**

**Brent Thompson:**

What do you concerning book? It is not important with you? Or just adding material when you need something to explain what yours problem? How about your time? Or are you busy individual? If you don't have spare time to perform others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? Every individual has many questions above. They must answer that question since just their can do which. It said that about guide. Book is familiar in each person. Yes, it is correct. Because start from on jardín de infancia until university need this specific Laboratory Protocols in Applied Life Sciences to read.

**Robin Blakely:**

Nowadays reading books become more than want or need but also become a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge your information inside the book that will improve your knowledge and information. The details you get based on what kind of book you read, if you want get more knowledge just go with education and learning books but if you want feel happy read one along with theme for entertaining including comic or novel. The particular Laboratory Protocols in Applied Life Sciences is kind of reserve which is giving the reader erratic experience.

**Joseph Mattie:**

As a scholar exactly feel bored in order to reading. If their teacher questioned them to go to the library or to make summary for some e-book, they are complained. Just tiny students that has reading's spirit or real their interest. They just do what the professor want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that examining is not important, boring as well as can't see colorful pics on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this Laboratory Protocols in Applied Life Sciences can make you sense more interested to read.

**Ian Sharpless:**

Some people said that they feel bored when they reading a e-book. They are directly felt this when they get a half portions of the book. You can choose the book Laboratory Protocols in Applied Life Sciences to make your current reading is interesting. Your skill of reading skill is developing when you just like reading. Try to choose easy book to make you enjoy to read it and mingle the idea about book and examining especially. It is to be first opinion for you to like to start a book and go through it. Beside that the guide Laboratory Protocols in Applied Life Sciences can to be your friend when you're sense alone and confuse in what must you're doing of these time.
