Six years. It sounds like such a long time when you sit down and think about it. In 2008, I started writing "Star Wars: Awakening" with the idea that I wanted to address a few issues that fans had expressed regarding the Prequels. Essentially, it was a grand experiment. I had never written anything longer than a term paper in college before this endeavor. I had never intended this to evolve into something this extensive. Writing a blog is one thing, but an entire novel? A series of novels? With original characters, rarely heard of planets, on such a massive scale while trying to keep the story itself intimate and personable?

Six years later, here we are. Over six thousand downloads (at time of publishing) have followed this story and await the conclusion. I've had people tell me that I've inspired them to write, to draw, to create, to imagine. I never believed that something as simple as this would actually change me as well. I suppose it is a testament to the impact of human interaction. Any word that comes out of my keyboard might be the one that touches someone and gets them to write or dream something fantastic. I'm not a professional, I'm not George Lucas, and I'm not a member of the one percent. I'm just a guy behind a laptop. Isn't that something? People across the planet have told me how much they've enjoyed my little trilogy and I'm just some guy behind a laptop.
