What if one day we discovered the technology that would allow us to live forever? What if in order to use this technology we would have to make a tough sacrifice? In this short fictional tale A.K. Tyler is trying to explore these questions, skilfully linking the future dystopian world with the modern society.

The Restart is a unique science fiction adventure and an absolute must-read for anyone interested in the dystopian or cyberpunk genre.

We are invited to take a peek into the distant future, a dystopian society where people achieved eternal youth and immortality with the help of a high-tech gadget. People no longer age or fall ill. But, there is always a price to pay. The main character - Sophia, an average law enforcing officer, wakes up after a strange dream she was not supposed to see, and remembers things that were not supposed to happen. The only way to get rid of her suspicions is to confront her fears, and risk her job and her status to seek help from the very people she had to be fighting - a dangerous terrorist organisation Santa Muerte. When she finally discovers the truth, there are tough choices to make that will change her life forever...
