Statistical Analysis of Human Growth and Development (Chapman & Hall/CRC Biostatistics Series)

Yin Bun Cheung

Statistical Analysis of Human Growth and Development is an accessible and practical guide to a wide range of basic and advanced statistical methods that are useful for studying human growth and development. Designed for nonstatisticians and statisticians new to the analysis of growth and development data, the book collects methods scattered throughout the literature and explains how to use them to solve common research problems. It also discusses how well a method addresses a specific scientific question and how to interpret and present the analytic results. Stata is used to implement the analyses, with Stata codes and macros for generating example data sets, a detrended Q-Q plot, and weighted maximum likelihood estimation of binary items available on the book's CRC Press web page.

After reviewing research designs and basic statistical tools, the author discusses the use of existing tools to transform raw data into analyzable variables and back-transform them to raw data. He covers regression analysis of quantitative, binary, and censored data as well as the analysis of repeated measurements and clustered data. He also describes the development of new growth references and developmental indices, the generation of key variables based on longitudinal data, and the processes to verify the validity and reliability of measurement tools. Looking at the larger picture of research practice, the book concludes with coverage of missing values, multiplicity problems, and multivariable regression.

Along with two simulated data sets, numerous examples from real experimental and observational studies illustrate the concepts and methods. Although the book focuses on examples of anthropometric measurements and changes in cognitive, social-emotional, locomotor, and other abilities, the ideas are applicable to many other physical and psychosocial phenomena, such as lung function and depressive symptoms.

From reader reviews:

Staci Eager:

Nowadays reading books be a little more than want or need but also be a life style. This reading addiction give you lot of advantages. The huge benefits you got of course the knowledge the rest of the information inside the book that improve your knowledge and information. The details you get based on what kind of reserve you read, if you want send more knowledge just go with schooling books but if you want really feel happy read one together with theme for entertaining such as comic or novel. The Statistical Analysis of Human Growth and Development (Chapman & Hall/CRC Biostatistics Series) is kind of e-book which is giving the reader unforeseen experience.

Michael Walker:

A lot of people always spent their free time to vacation or even go to the outside with them household or their friend. Are you aware? Many a lot of people spent that they free time just watching TV, or playing video games all day long. In order to try to find a new activity here is look different you can read any book. It is really fun for you. If you enjoy the book which you read you can spent 24 hours a day to reading a guide. The book Statistical Analysis of Human Growth and Development (Chapman & Hall/CRC Biostatistics Series) it is very good to read. There are a lot of people that recommended this book. These were enjoying reading this book. In case you did not have enough space to bring this book you can buy often the e-book. You can m0ore effortlessly to read this book from the smart phone. The price is not to cover but this book provides high quality.

Tania Hansen:

People live in this new moment of lifestyle always try to and must have the time or they will get wide range of stress from both everyday life and work. So , when we ask do people have free time, we will say absolutely yes. People is human not a robot. Then we ask again, what kind of activity are you experiencing when the spare time coming to an individual of course your answer can unlimited right. Then do you try this one, reading guides. It can be your alternative inside spending your spare time, often the book you have read is definitely Statistical Analysis of Human Growth and Development (Chapman & Hall/CRC Biostatistics Series).

Micheal Goggin:

In this time globalization it is important to someone to acquire information. The information will make a professional understand the condition of the world. The healthiness of the world makes the information easier to share. You can find a lot of personal references to get information example: internet, newspapers, book, and soon. You will see that now, a lot of publisher in which print many kinds of book. The particular book that recommended to you personally is Statistical Analysis of Human Growth and Development (Chapman & Hall/CRC Biostatistics Series) this e-book consist a lot of the information with the condition of

this world now. This specific book was represented how can the world has grown up. The dialect styles that writer use for explain it is easy to understand. The actual writer made some exploration when he makes this book. This is why this book appropriate all of you.
